

RIMJHIM DEY

Computer Science & Engineering Undergraduate — Machine Learning, Applied Research & Full-Stack Development

Chattogram, Bangladesh | +880 1630 083289 | rimjhimdey91@gmail.com | github.com/RimjhimD

SUMMARY

Final-year Computer Science student focused on machine learning and applied research. Builds complete pipelines, from preprocessing and class-imbalance handling through to model benchmarking and hyperparameter tuning, and supports this with full-stack engineering across REST APIs and databases. Automation is a continuing interest, covering CRM and billing workflows, scheduling pipelines and API integrations built outside coursework.

EDUCATION

B.Sc. in Computer Science & Engineering

Fall 2022 – **Expected Mid 2027**

Premier University, Chattogram

CGPA 3.62 / 4.00 · Currently in 8th semester

Higher Secondary Certificate, Science

2021

Bakalia Government College, Chattogram

GPA 5.00 / 5.00

Secondary School Certificate, Science

2019

Dr. Khastagir Government Girls' High School, Chattogram

GPA 5.00 / 5.00

PROJECTS

Cerebral Stroke Prediction

MACHINE LEARNING

2026

Built an end-to-end pipeline on clinical data covering feature engineering, class-imbalance resampling and stratified k-fold cross-validation; benchmarked XGBoost against TensorFlow and PyTorch neural networks and tuned them with Optuna.

Tech: Python · scikit-learn · TensorFlow · PyTorch · XGBoost · Optuna

github.com/RimjhimD/Cerebral-Stroke-Prediction

Skin Cancer Type Detection

DEEP LEARNING

2025

Benchmarked DenseNet, ResNet and a Vision Transformer on the HAM10000 dermatoscopy dataset under a common transfer-learning setup.

Tech: Python · CNNs · Vision Transformers · Google Colab

Product Management System — REST API

BACKEND

2025

Designed a layered Spring Boot REST API over MySQL with CRUD, server-side search, sorting, pagination and authentication, served through a React dashboard.

Tech: Java · Spring Boot · JPA · MySQL · React

github.com/RimjhimD/product-management-rest-api

CRUDCare — Blood Bank Management System

FULL-STACK

2024

Developed a donor, stock and request management platform with user authentication, role-based access and full CRUD.

Tech: PHP · MySQL · HTML/CSS

github.com/RimjhimD/CRUDCare

PayCraft — Digital Payment Interface

FRONTEND

2024

Built a responsive payment web application with a validated payment form and a restructured transaction table.

Tech: HTML · CSS · JavaScript

github.com/RimjhimD/PayCraft

Additional projects: Smart City IoT network (Cisco Packet Tracer, 4 VLANs) · Virtual Wizard, a sensor-driven Kotlin Android game · FastAPI service with a GitHub Actions CI/CD pipeline · ESP32 + DHT11 sensor web server.

TECHNICAL SKILLS

Languages

Python, Java, C, C++, Kotlin, JavaScript, PHP, SQL

ML & Data

scikit-learn, TensorFlow, PyTorch, XGBoost, Optuna, Pandas, NumPy, Matplotlib

Web & Backend

Spring Boot, FastAPI, Laravel, React, REST API design, HTML/CSS, Bootstrap

Automation

GoHighLevel CRM workflows, webhook & REST integrations, scheduling pipelines

Tools

MySQL, Git & GitHub, GitHub Actions, Google Colab, Linux, Android Studio
